Montréal, QC

Objective: Software Engineer Intern

SUMMARY:

An adaptable graduate with a degree in Software Development, I have honed my skills in crafting dynamic and interactive user interfaces using ReactJS, TypeScript, and Redux Toolkit. Proficient in web fundamentals such as HTML, jQuery, CSS, SCSS, and JavaScript, as well as being skilled in other technologies essential for the role, my focus lies in continuous learning and adapting to new information. Demonstrating adeptness in handling HTTP requests, utilizing React Router, and exploring various React ecosystem technologies, I bring a versatile skill set with a keen ability to learn quickly and deliver high-quality results.

SKILLS:

- Experience with web fundamentals: **HTML5, jQuery, CSS3, SCSS, JavaScript, Typescript**
- Strong understanding of **React** and its ecosystem (Redux Toolkit, React Router)

- Knowledge in data structures, algorithms, web programming concepts
- Experience integrating **REST API** design and **MVC** architecture
- Understanding on **Object Oriented Programming concepts (OOP)**
- Knowledge of database technologies (**SQL**)
- Knowledge of **Java, Spring Framework,** knowledge of **HTTP**
- Familiarity with version control systems (**Git**)

- Understanding of responsive design, User Interface **(UI)** and User Experience **(UX)** best practices
- Proficient in graphic design software: **Photoshop, InDesign, Figma, Adobe XD, Illustrator**
- Microsoft Office suite

Languages: English (full professional proficiency), Polish (professional working proficiency), Russian (bilingual proficiency), Ukrainian (native proficiency), French (elementary proficiency)

Soft skills:
- Ability to learn quickly and to adapt to a fast-paced environment
- Passionate about development
- Strong analytical, organizational, and problem-solving skills
- Time management skills

EDUCATION:

- Engineering studies in the field Software Engineering (University of Business in Wrocław)   **September 2019 - February 2023**

EXPERIENCE:

Cashier TimHortons, Mercier, Canada   **March 2023 - now**

Crew member/cashier KFC(PFK), Amrest Poland   **March 2021 - July 2022**

PROJECTS:

- Frontend React Application Project
  Yourstylishontario.infinityfreeapp.com

  Studied a variety of technologies, significantly contributing to growth and proficiency in frontend development.
  Acquired hands-on experience in developing dynamic and interactive user interfaces using ReactJS 18 and TypeScript. Demonstrated adeptness in state management by effectively utilizing Redux Toolkit.
  Utilized React Router v6, Fetch/Axios, and other technologies to handle HTTP requests and retrieve data from the backend. Explored and applied React Hooks, PropsDrilling, Context and Forwarding Refs, showcasing versatility in the React ecosystem.
  This solo project deepened my understanding of all stages of application development, enabling me to navigate and overcome challenges with newfound skills.
